SCHEDULE

Description of the undertaking and the manner in which the foreshore and sea-bed will be affected by the proposed undertaking

Foreshore and sea-bed affected

Approximately 1.73 hectares of foreshore and sea-bed from Chung Hom Kok to the eastern boundary of the Hong Kong Special Administrative Region, as delineated and shown by a bold red line on a plan, numbered HKM10685, deposited in the Land Registry.

- (i) Installation of an optical fibre submarine cable of approximately 34.6 kilometres in length and 38 millimetres in diameter. A cable-laying barge will be employed to simultaneously lay and bury the submarine cable in a trench of about 0.5 metre in width at a target burial depth of about 5 metres below the sea-bed. For the cable section near the shore, the cable will be installed by divers and protected by articulated pipe.
- (ii) At the crossing of an existing gas pipeline, the proposed cable will be surface laid either by the burial tool or divers, over the top of the gas pipeline, for a section of approximately 200 metres to avoid any interference. Additional cable protection by 'Uraduct' will be employed.
- (iii) Where the proposed cable crosses with an existing submarine cable, burial depth of about 3 metres below the sea-bed on top of the existing cables will be required. The actual burial depth will be subject to the depth of the existing cables.
